Approvals and Workflow

Course Level: Introductory
Audience: Financial and business administrators and assistants or anyone with the security access role of Approver.

Course Format
This course is online only, but access to learning is continuous and on demand. You may start learning at any time and review the learning materials at any time. However, course registration is strongly encouraged.

Course Registration and Enrollment
Register for FSM804 Approvals and Workflow in FASIS Self-Service (also called eDev). Doing so signals an instructor that you are using the online learning. It also enables you to receive support from an instructor and peers while you learn.

Course Sessions
Course sessions exist to provide a timeframe for your learning and for instructor/student interaction. Sessions start the first day of each month and end on the last day of each month. Registration for each coming month is open until the last day of the current month. For example, January 31st is the cut-off date for enrollment in the session starting February 1st. New registrations after the cut-off date fall into the subsequent month. For example, registrations on or after February 1st fall into March.

Course Communications
On the first business day of each month, the instructor contacts all registrants via e-mail to kickoff communication. You may pose questions to the instructor via the Café Training e-mail address and to the group.

Course Completion
The instructor marks all current registrants complete at the end of each month. The month timeframe is intended to give you time to:
• Complete the learning experiences at your own pace and convenience.
• Ask questions when they arise.
• Bridge the time between first learning experiences and first job experiences.

System Requirements
Project Café’s online learning works best with Internet Explorer.
Learning Sequence

Below is the recommended learning sequence with notes and special instructions, if any. Learning materials that are valuable anytime are given a sequence # NA.
